Enovation Connected Care

We are Enovation. We care about health and social care. We are your independent, trusted and reliable platform for digital care and collaboration.

Care organisations are experiencing rapid changes. People live longer and need more care, and staffing supply does not increase. This situation requires a different way of organising care. The Enovation Platform helps you to collaborate in a smart way and provide digital care. This prepares you for the increasing health and social care demand.

We believe that we can facilitate integrated care and contribute to better digital care by effectively connecting health and care organisations, professionals and patients. Care providers can then focus on what truly matters: giving people their time and attention.

The Enovation Platform thus contributes to the development of future-proof care and is of importance in several current healthcare topics such as:

Patient Engagement

Medication Safety

Care Coordination

Information Exchange in Healthcare

Telemonitoring

Want to know what our platform can do for your organisation? Visit www.enovationgroup.com or contact us without obligation on +44 (0) 844 5611814 or via email at info.co.uk@enovationgroup.com.
